SUMMARY OF FINDINGS AND RECOMMENDATIONS

SUC: BICOL UNIVERSITY

ADDRESS: Legazpi City, Albay

CAMPUS: Legazpi City Campus

PROGRAM: Bachelor of Science in Information Technology

TYPE OF SURVEY: 2nd Survey

DATE OF SURVEY: April 24-28, 2023

AREA OF ACCREDITATION	STRENGTHS	AREAS NEEDING IMPROVEMENT	RECOMMENDATIONS
AREA I: VISION, MISSION, GOALS, AND OBJECTIVES	1. The Vision and Mission of the university are explicitly articulated. For a deeper comprehension and appreciation of the institution's future goals and the services, it offers to achieve its Vision and Mission. 2. A VMGO committee has been established at the college to oversee the periodic and systematic review, revision or updating, production, dissemination, and documentation feedback on the disseminated materials.	1. Incomplete document justifying alumni and stakeholders' involvement in VMGO dissemination and other campus activities. 2. The instrument used to measure awareness and acceptability was not constructed properly in light of the data presented. 3. Inadequate documentation of compliance during the most recent survey visit, particularly on the employability of graduates.	1. The BSIT program may collaborate with other campus organizations to enhance alumni participation in the dissemination of the VMGO and other campus activities. 2. Even though the instrument used to assess VMGO awareness and acceptability lacks validity, it is strongly suggested that it be redesigned to measure what it claims to measure. In addition, it is suggested that the instrument include methods for promoting and disseminating the VMGO's level of awareness, acceptability, internalization, and feedback collection as a basis for developing an action plan to enhance and sustain VMGO awareness and internalization. 3. Adhere to every recommendation made during the previous survey visit and provide all supporting documentation. For a better understanding, a study on the employability assessments of graduates could be conducted to appreciate the successful graduates as they were demonstrated during the interview.

AREA OF ACCREDITATION	STRENGTHS	AREAS NEEDING IMPROVEMENT	RECOMMENDATIONS
AREA II: FACULTY	1. Its faculty members are master's and doctorate degree holders aligned with its field of specialization. 2. The research engagement of its faculty is evident through presentation and publication in various fora and reputable journals, respectively. 3. There is an adequate faculty workload to deliver efficient services or quality education to its students and the university. 4. Faculty members were given allotted credit incentives for the development of instructional materials (instructional manuals and the like). 5. Faculty members adopt the preparation of instructional materials with the application of the recent trends of the available technology today in delivering modes of instruction. 6. The College of Science where the Information Department resides, is engaged in an income-generating scheme through its active engagement with the University of Cordilleras by using	1. Dissemination of hiring for prospective faculty members through broadcast media was not included as part of initiatives for informing the general public. 2. It was found in the provided evidence that the university admits full scholarships for faculty involving its perks once approved, however, the provision of a de-loading of academic workload to finish his/her thesis or dissertation only was not evident. 3. The active membership of its faculty members is sustained through the faculty's own contributions. 4. Documented activities in various plans and activities of the IT Department specifically focused on faculty welfare were not comprehensive. 5. The involvement of faculty in certifications and awards is limited. 6. A certificate of utilization for the instructional materials developed was not evident. 7. Lack of evidence on the compliance of health insurance on	1. The Human Resources Department of the University may need to consider other forms of dissemination, such as the broadcast media, either TV or radio, to reach out to the general public with information about its faculty hiring. 2. The inclusion of a de-loading scheme for faculty to finish his/her master's thesis or dissertation may be considered in its faculty development plan. 3. The inclusion of financial support aided by the administration for faculty membership in professional organizations may be provided in the Faculty Development program if the budget permits. 4. It is recommended that the conduct of various plans and activities that involve the faculty be properly documented for easy validation of their conduct. Practice the context of "Treat every day as an accreditation day." 5. The faculty may need to actively engage in various ICT

	its facilities and qualified pool of faculty.	the part of the administration from the last survey visit	organizations that provide certification exams and distinct ICT awards, enhancing faculty professional growth with the support of the administration. 6. A certificate of utilization may be issued to faculty upon approval of its instructional materials submitted to the University Instructional Materials Committee. 7. Consider compliance from the last survey visit that the administration may need to opt for including health insurance as an added fringe benefit given to employees of the university.
--	---	---	---

AREA OF ACCREDITATION	STRENGTHS	AREAS NEEDING IMPROVEMENT	RECOMMENDATIONS
AREA III: CURRICULUM AND INSTRUCTION	1. The BSIT curriculum complies with CHED's minimum standard requirements. Similarly, the curriculum has been enhanced to align with the institutional and program objectives of Bicol University. 2. The program adheres to the instructional outcomes-based standard for course syllabus development 3. BSIT students of BU Legazpi Campus are champions in the White Hackfest Competition which was participated by different universities. 4. The curriculum is responsive and relevant to the demands of time.	1. The COPC for the Bachelor of Science in Information Technology has expired. 2. Insufficient evidence exists of alumni student leaders or other representatives from the industry sector participating in the curriculum review. 3. There is insufficient documentation to justify the claim that instructional material is copyright protected. 4. Lack of evidence that examination papers and TOS are reviewed and approved by the college dean or program chairperson before their implementation. 5. Lack of documentation on participation in hands-on activities such as immersion amidst the pandemic to facilitate teaching and learning management. 6. Absence of evidence that evaluation tools/instruments are regularly reviewed and revised. 7. A policy is attached for remedial measures, but there is no evidence that the policy is being implemented to accommodate and	1. The BSIT Program may consider re-applying for the COPC of the program. 2. The involvement of students, alumni, and industry representatives in the curriculum review process must be fully documented, including attachments of programs, attendance records, memoranda, and invitation letters. Appropriate and unambiguous images should accompany all of those activities. 3. Faculty members are recommended to submit instructional materials for copyright protection. 4. Examination papers and TOS of the BSIT program are encouraged to undergo review and evaluation by authorized personnel in the program before their implementation. 5. The BSIT program may recommend encouraging students to participate in hands-on activities such as immersion amidst a pandemic by applying the CMO 63 series 2017 and CMO 104 series 2017, to justify its implementation.

		assist students in strengthening their basic skills in completing their degrees. 8. Lack of evidence demonstrating that instructional strategies are effective at meeting individual needs and integrating multiple intelligences. 9. Lack of research on the employability of graduates for the last three years (2020-2022). Employer feedback on graduates' performance is not provided. 10. Inadequate evidence that compliance was achieved during the previous survey.	6. Evidence of the review and revision of evaluation tools/instruments must be attached. 7. If there is no remedial activity for the students, an attachment of a certification signed by the appropriate authorities may be made. 8. Ensure that the attachment contains all necessary information about sample instructional strategies that incorporate multiple intelligences and their implementation. Cooperative learning, peer tutoring, and teaching students methods for resolving group problems are all examples of this, like using class meetings to facilitate social problem-solving. Allow them to collaborate on social problem-solving. 9. A tracer study may be conducted regularly to monitor students' employability and collect information about employer feedback. 10. Adhere to and document in full all recommendations made during the previous survey visit.

AREA OF ACCREDITATION	STRENGTHS	AREAS NEEDING IMPROVEMENT	RECOMMENDATIONS
AREA IV: SUPPORT TO STUDENTS	1. There is a newly built Student Union Center that caters to various students' needs and provides a spacious, clean, and comfortable area. 2. Sports facilities accommodate various sports activities and can handle expected audiences. 3. There is a newly built medical and dental facility with equipment able to facilitate its clientele. 4. The ratio of a Guidance Counselor per student served meets the standard of 1:1000. 5. There is an immediate avenue for counseling through its KALUGOS program, which is tele-counseling assistance for Bicol University students needing their services.	1. The location of records of the student's profile in the guidance office is not properly labeled. 2. Student placement monitoring and follow-up were not evident. 3. There was no evidence found that the guidance unit conducts career counseling for continuing students that will guide them to choose their appropriate field of specialization. 4. In the tracer study, alumni who hold key positions and have received awards for their current/previous work were not included. 5. The Disaster Risk Reduction Management program was not presented. 6. A student retention policy helps one academic unit check its effectiveness in delivering quality education. However, evidence of this was not seen. 7. Most of the security licenses presented are expired, and only two of the many security guards at the university had valid security licenses.	1. The guidance office may properly label their filing cabinets according to the appropriate content per panel (e.g., student records and others). 2. The liaison officer's task is to communicate with and monitor alumni and encouraged them to do continuous monitoring and follow-up to update alumni's profile records for future use. 3. The guidance unit may initiate activities like career counseling for continuing students to guide them to decide according to the field of specialization they need to fit in. 4. In the next conduct of the tracer study as well, the person-in-charge of monitoring graduates of the college or department may need to include this information on alumnae's current key positions and awards received in their recent and previous work/job. 5. It is recommended that the university may craft/develop a

		8. Limited activity was conducted for fire and earthquake drills. 9. No OSAS research was presented and published in national or international research forums or reputable journals, respectively. 10. There was no evidence presented that monitoring and evaluation of instruments are continually reviewed and updated. 11. Various activities and programs conducted for students had limited documentation to measure the validity of their conduct. 12. The student profile of students for career and job placement purposes in the guidance office was not presented in the evidence. 13. Lack of evidence on the compliance, effectiveness, and sustainability of the programs of student services from the last survey visit.	disaster risk reduction management program. 6. A retention policy may be developed and approved to guide students in their continual qualification in the college. 7. It is suggested that all working security guards on the university premises always have an updated security license attesting to the valid conduct of their duties. 8. The institution may need to consider regular fire and earthquake drills for everyone. 9. It is recommended that research conducted by OSAS be presented in national or international forums and published in reputable journals. 10. The institution may take into consideration continual review and updates of the evaluation instruments utilized for OSAS services and other purposes for which they may be used. 11. It is recommended that complete documentation of various student activities conducted in the college and at the university be applied to readily validate their conduct.
--	--	--	--

			12. The guidance office may need to consider filing student profiles for career and job placement purposes for easy referencing in the future. 13. Reiterating the recommendation made from the last survey visit that more in-depth research be conducted as regards the effectiveness and sustainability of the programs of the student services.
--	--	--	---

AREA OF ACCREDITATION	STRENGTHS	AREAS NEEDING IMPROVEMENT	RECOMMENDATIONS
AREA V: RESEARCH	1. Research outputs are published in refereed journals and indexed in Scopus. 2. The research outputs of the BSIT students are awarded Best Undergraduate Thesis. 3. The research outputs of the BSIT students are utilized by the concerned agencies. 4. Strong linkages with local/national/international agencies for funding support and assistance.	1. There are only a few core faculty members who conduct discipline-related research. 2. There are a limited number of core faculty members who have published research in refereed journals and a lack of documents on research copyright and the commercialization of research outputs. 3. Inadequate data on studies aimed at institutional development, instructional process improvement, and community-based technology transfer. 4. The transfer of developed technology from the IT Faculty's research outputs into the community is not evident.	1. Faculty members of the BSIT program are encouraged to produce more research relevant to the program's objectives. 2. Faculty researchers are encouraged to apply for copyrighting, patenting, licensing, and commercializing of research outputs to generate revenue from research outputs. 3. The commercialization of research outcomes is encouraged. The product of research that has been translated into instructional materials may also be commercialized in accordance with your university's business policies and guidelines. 4. The BSIT program may have influenced IT faculty to share their newly developed technology with the community that has been the output of their research study, rather than simply BSIT students.

AREA OF ACCREDITATION	STRENGTHS	AREAS NEEDING IMPROVEMENT	RECOMMENDATIONS
AREA VI: EXTENSION AND COMMUNITY INVOLVEMENT	1. The Extension Manual has been revised to include a specific plan for enhancing the quality of life for clients. 2. The extension programs consider local, regional, and national development, trusts, and priorities. 3. The extension unit is responsive to the needs and requests of the community. 4. The Extension Unit has strong links with local, national, foreign, and non-governmental agencies.	1. The BSIT Program has limited involvement in extension proposals amidst the pandemic. 2. It is not evident that research outcomes are utilized in the implementation of extension programs. 3. There is no monitoring and evaluation of extension programs and project implementations amidst the pandemic. 4. No impact analysis of the implemented extension activities is conducted. 5. The Extension Manual of the Institution is not copyrighted. 6. Members of the BSIT faculty on campus are not involved in national or international extension conferences. 7. Lack of documentation on the implementation of extension programs involving the administration, faculty, and students amidst the pandemic.	1. All faculty members in the program being evaluated are encouraged to submit extension proposals consistent with the program's extension objectives. 2. Consideration should be given to incorporating research findings into extension program delivery. 3. For each extension program/project, monitoring and evaluation may be conducted to measure the project's effectiveness, whether quantitative or qualitative, in terms of utilization of technology, acquired knowledge, and acquired skills. 4. Conducting impact assessments may be considered a crucial component of every extension activity or program. After every extension activity, it is suggested that an impact analysis be conducted to determine how the activity affected the lives of the clientele. 5. The institution may consider applying the Extension Manual for copyrighting.

			6. Faculty members of the BSIT program are encouraged to present their extension output in national or international forums. 7. Despite the inclusion of images, this does not meet the benchmark requirement. Thus, a sample document must be presented for the implementation of extension programs, such as extension proposals, programs, attendance sheets, terminal/accomplishment reports, needs assessment forms, and evaluation and monitoring tools for every extension project/program, involving the administration, students, and faculty, to justify its implementation.
--	--	--	--

AREA OF ACCREDITATION	STRENGTHS	AREAS NEEDING IMPROVEMENT	RECOMMENDATIONS
AREA VII: LIBRARY	1. The library is a separate building, strategically located, with appropriate fixtures and space, and is structured for future expansion. 2. The library personnel are competent, hardworking, and dedicated. 3. A licensed, competent, and professional librarian administers and supervises the library. 4. There is an interactive webpage of the library that promotes and disseminates its services, programs, and learning resources. 5. The library is open for 64 hours per week, which exceeds the minimum required library hours. This library practice can enhance the learning experience by providing more time for students to study, conduct research, and complete assignments.	1. Various library plans are either outdated or not available. 2. No regular Library Committee meeting was being conducted. 3. Seminars/training/workshops related to library and information science are limited. 4. There are guidelines for weeding out obsolete and unwanted collections. However, it has not been applied to date. 5. Filipiniana books do not comply with the CHED's minimum standard. 6. The number of professional books for the program under the survey is insufficient. 7. Funds allocated for books, journals, electronic resources, equipment, and furniture are inadequate. 8. Information dissemination about library services and resources to library users is not sufficient. 9. Linkages with other institutions through the exchange of publications and sharing of resources with the Memorandum of Agreement/Understanding are missing.	1. The librarians with the administrators may formulate, update, and submit the following plans for the approval of concerned officials: • 5-Year Library Staff Development Plan; • Disaster Preparedness, Response, and Recovery Plan; • Collection Development Plan; and • Library Automation Plan. These plans can ensure the continuous improvement of the program's resources and services. 2. It is recommended that the BSU Library Committee conduct its regular meetings either by face-to-face arrangement, using a virtual/online platform, or a combination of both. 3. Encourage and support the attendance of the library staff at more relevant training, workshops, and conferences to enhance their skills and knowledge of the new library trends. Furthermore, financial

		10. The security measures in the library are not adequate. 11. The temperature inside the library is quite humid and hot. 12. Photocopying services are missing. 13. Some parts of the library building need to be repaired and retiled.	4. assistance from the institution may also be provided. It is highly suggested to put into practice the guidelines made in the weeding of obsolete and unwanted collections to maintain a current and relevant collection that will support the instructional and research requirements of clients. 5. Acquire more Filipiniana books to maintain an equivalent of ten percent (10%) of the current total collection as per CHED CMO 22 Series of 2021. (<i>Minimum Requirements for Libraries of Higher Education Institutions Common to All Programs</i>) 6. To comply with the standards, more research and professional books copyrighted within the last five years may be acquired. In addition, journal subscriptions may also be sustained. 7. The administrators may allocate additional funding for purchasing books, journals, computers for students, OPAC stations, printers, book scanners, audio-visual materials, furniture, etc. 8. For maximum utilization of library services and resources, the following types of
--	--	--	---

			information dissemination strategies may be explored: • Online Library Brochure or Guide (E-brochure); • Electronic Bulletin Board (TVs); • Library programs for students (games, contests, exhibits, etc.) • Selective dissemination of information through email (Blast e-mail); and • Online library step-by-step video tutorial 9. Linkages with other institutions through the exchange of publications and the sharing of resources through a Memorandum of Agreement/Understanding are suggested. 10. Additional CCTV cameras may be installed inside the library to ensure the safety of the library collection. 11. It is recommended that the temperature inside the library be improved by providing ventilation devices (air-conditioning units, electric fans, etc) to make the place conducive to studying and learning.
--	--	--	--

			12. A photocopying machine may be procured to provide the prescribed library services for the students, faculty, and staff members (CHED CMO 22, s. 2021). 13. Repairing roof ceilings and retilling broken floor tiles may be fast-track to enhance and maintain the library's aesthetic features.
--	--	--	---

AREA OF ACCREDITATION	STRENGTHS	AREAS NEEDING IMPROVEMENT	RECOMMENDATIONS
AREA VIII: PHYSICAL PLANT AND FACILITIES	1. Sports facilities accommodate various sports activities and can handle expected audiences. 2. There is a newly built Student Union Center that caters to various students' needs and provides a spacious, clean, and comfortable area. 3. There is a newly built medical and dental facility with equipment able to facilitate its clientele. 4. A newly built male and female dormitory is ready to serve its student clientele conveniently, comfortably, and safely away from home. 5. It is noted that the College of Science building is annually insured. 6. Classrooms at the college are conducive to learning. 7. There are office spaces provided for different student organizations at the college.	1. The site development plan is visible but temporarily displayed through a tarpaulin, which could lead to a short period while it is seen. 2. The College of Science, where Information Technology resides, had no certificate of occupancy displayed in the building. 3. A document to prove that fire extinguishers are regularly checked so they may be readily available and functional for all buildings in the university was not presented. 4. Documents to prove that all buildings at the university are insured were not evident. 5. A periodic potability test of water was not presented in the evidence. 6. A limited document was presented to check if the pest control activity of the university is regularly conducted. 7. An inventory of supplies and materials at the college was not presented.	1. It is recommended that the site development plan, as it is conspicuously displayed, be placed in a durable material for long exposure. 2. A certificate of occupancy may be considered for all buildings on the campus to ensure compliance with the national building code of the Philippines and the suitability of their occupancy. 3. A documented regular monitoring of fire extinguishers is recommended. 4. It is suggested that an annual documented record for all buildings insured at the university be filed. 5. A potability test of the water supply on campus is recommended to check water safety specifically for students' use. 6. The university may need to consider the conduct of a regular pest control activity to ensure everyone's safety on campus, and complete

	8. Safety measures placed in the indoor facilities utilized for indoor sports, cultural activities, and the like were not evident. 9. No evidence of potable water on the university premises was seen. 10. Supplies for dentistry and medicine were not listed for inventory purposes. 11. There are only a few medical and dental supplies that clearly have adequate labeling. 12. Appropriate document to show that canteen stalls in the university are well managed by qualified staff. 13. There is no functional drinking water in the assembly and athletic facilities. 14. A central alarm system for the campus was not evident. 15. There is no evident documentation where students are involved in the cleanliness and maintenance of classrooms. 16. Lack of evidence on the compliance of the installation of screened doors and windows in the canteen from the last survey visit.	documentation may suffice to validate it. 7. The college may regularly conduct an inventory of its supplies and materials for continuous provision for classroom needs and other purposes where it is required. 8. Safety measures are posted in indoor facilities for everyone's awareness. 9. Potable water readily available on the campus premises is recommended. 10. It is recommended that a documented inventory of medical and dental supplies be regularly filed for easy reference. 11. Appropriate labeling of all medical and dental supplies is suggested. 12. A designated staff is suggested to manage canteen stall operations on the campus to maintain the validity of their operations, cleanliness, and maintenance. 13. A functional drinking water area is suggested to be placed in the assembly and athletic facilities of the campus.

*Summary of Findings and Recommendations-BU
BS in Information Technology-2nd Survey
April 24-28, 2023*

			14. A separate central alarm system aside from the fire alarm system that may be utilized for any emergency purpose is suggested. 15. A documented involvement of students in the department or college in the maintenance of cleanliness in classrooms may be considered. 16. Reiterating the recommendation given from the last survey visit that installation of screened doors and windows in the canteen may be considered.
--	--	--	---

AREA OF ACCREDITATION	STRENGTHS	AREAS NEEDING IMPROVEMENT	RECOMMENDATIONS
AREA IX: LABORATORIES	1. There is a periodic inventory of computer equipment and devices in the laboratory. 2. A conducive and spacious computer laboratory is provided. 3. Computer laboratories suffice to cater to the number of students allowed for a computer laboratory class. 4. There is regular conduct in the maintenance and upkeep of computer laboratories and other laboratories in the college. 5. Computer laboratories and other laboratories are installed with complete first-aid kits and printers. 6. The college had a natural language processing research facility to provide its research needs as it partnered with the Kalahok project of CHED to engage NLP in community participation.	1. The placement of safety measures in the computer laboratory was not durable enough for longevity exposure as they were pasted only on the wall. 2. An approved laboratory manual was not evident. 3. Regular conduct on the proper use of facilities and equipment utilized for emergency events is not properly documented. 4. Software licenses utilized for classroom use are limited. 5. Lack of evidence on the compliance of replacing the wooden board from the previous survey visit.	1. A durable location for posting safety measures for the computer laboratory is suggested. 2. It is recommended that the laboratory manual used for classroom use be issued with approval for its utilization from the University Instructional Material Committee. 3. A well-documented activity in the regular conduct on the proper use of facilities and equipment utilized for emergency events is suggested. 4. The college may need to consider procuring other software licenses or continual subscriptions needed for classroom use to avoid the limited capabilities offered by free software. 5. Reiterating the given recommendation from the previous survey visit that the maintenance department may need to replace the wooden board with glass to secure the units inside the laboratory free from rain during the rainy season.

AREA OF ACCREDITATION	STRENGTHS	AREAS NEEDING IMPROVEMENT	RECOMMENDATIONS
AREA X: ADMINISTRATION	1. The qualifications of the academic administration and faculty surpass the minimum requirements prescribed by CMO No. 15 s. 2017. 2. The organizational structure of the institution reflects the scope and line of administrative responsibility of the identified unit.	1. Lack of documentation to show that the budget is efficiently managed. 2. Inadequate documentation to support the implementation of supply management, impeding the efficiency and effectiveness of supply management and procurement transactions. 3. Lack of evidence that the Planning and Development Unit of the institution regularly monitors and evaluates its planned activities and targets. 4. There are insufficient indications that the SDP is implemented, monitored, evaluated, reviewed, and updated.	1. As required by CHED CMO 20 s. 2011, budget allocation versus utilization must be presented to justify the appropriated budget. Other documents, such as a monthly or quarterly report on the use of funds, must also be included; this can serve as the premise for a catch-up plan. 2. To justify the implementation of procurement and deliveries of required equipment, supplies, and materials, the approved APP and PMP of the program under review may be presented. Similarly, comprehensive documentation may be supplied to ensure that BAC carries out its duties and responsibilities. In addition, an annual inventory of serviceable and non-serviceable facilities and equipment is required. You may also attach Philgeps' posting to attest that procurement is published. 3. The presentation of evidence of regular monitoring and evaluation is required. The outcome of which may serve as the premise for developing an enhancement plan. 4. Provide evidence that the SDP has been implemented, monitored, evaluated, reviewed, and updated.
